

## INTRODUCTION

The Spanish Special Operations department presents his new event for the 6 million hours of the Spanish Division.

The event will take place the 16th November 2019 from 11.00z to 14.00z and it will take place in the surroundings of Leon (LELN).

## SITUATION

Spain is preparing maneuvers in the north of Spain. Our mission is to improve coordination between Spanish Air Force and Spanish Army creating a FOB and supporting observations posts.

Our staff want to see coordination between them performing air transport with planes and helicopters and after that Transport the material by trucks and helicopters that are in the Spanish Army.

Our work is transport all the needed material and drop it in a Drop Zone (D/Z) or directly take it with helicopters to the FOB or to the observations points.

## PILOT INFORMATION

The pilots will take off from Leon (LELN, the place where is located the NCO academy), to proceed to the FOB and transport all the needs. In this occasion we can use transport, light planes and helicopters.

The FOB is located in:

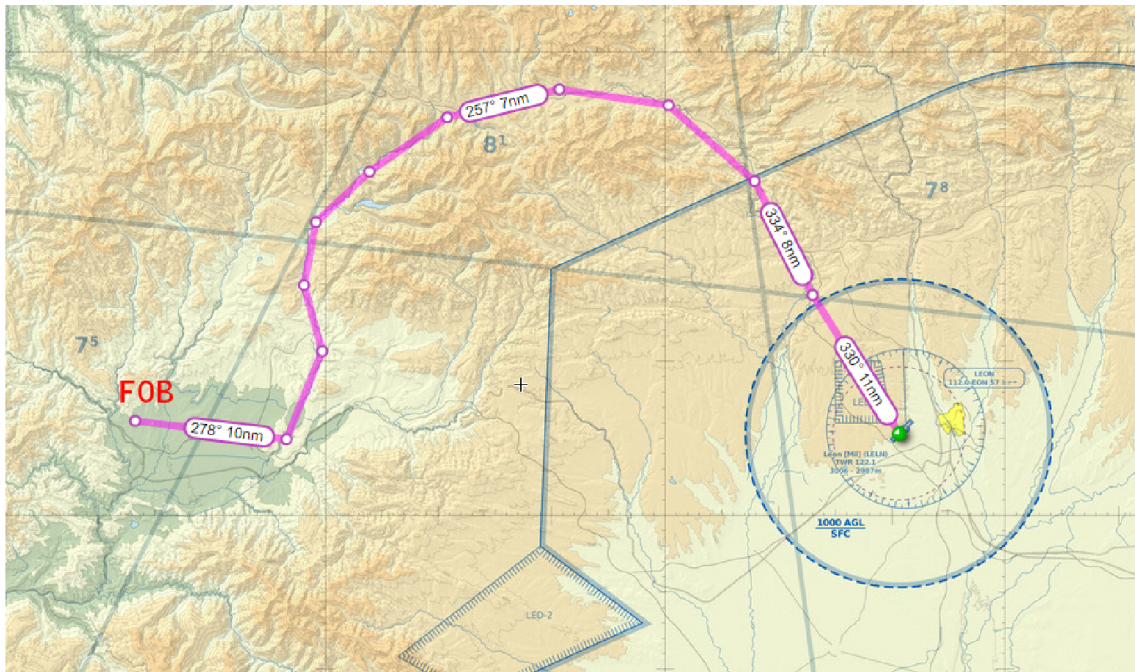

N42° 36.14' W006° 46.73'

Also in this occasion, we have a Drop Zone (D/Z) to drop with a parachute the load of the biggest planes which could not land on the FOB, in this D/Z will be trucks and helicopters to transport that material to the FOB.

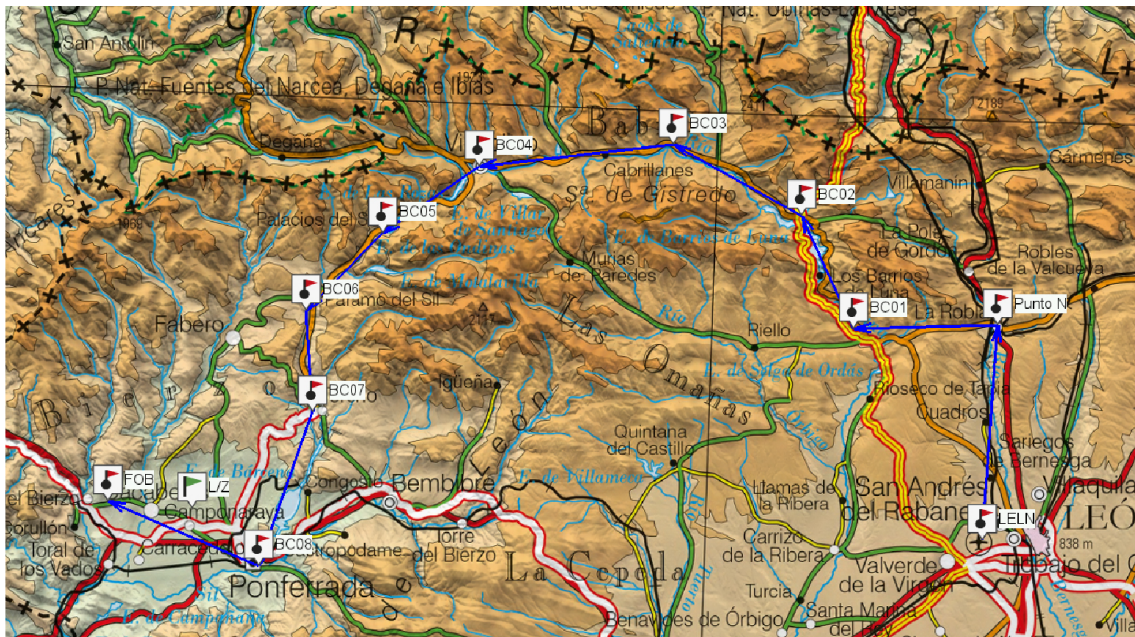

The D/Z is located in:

N42° 35' 57" W006 40' 09"

The planes will perform a low flight no more than 1000ft over the terrain to proceed to the FOB or drop zone.

Our Generals are informing that advanced points are being created for receive all the material, they way to take there this items could be by droops or by helicopter, and it is possible that we have to droop troops over this zones. It depends on the availability on this type of aircrafts. The advanced zones are not ready yet.

The day before of the event we will upload an additional file with maps, coordinates, key words, etc. The link will be on the post of the event.

Airplanes for this event must be able to take on unprepared runways, 1000 x 30 meters

## ATC INFORMATION

In this case we will have:

<b>LELN_TWR</b>	AS3 With CAO knowledges.
<b>LECM_SAN_CTR</b>	ADC
<b>LECM_MIL_CTR</b>	APC+CAO (mandatory)

For all controllers of other divisions they should own the GCA.

## COMPLAN

The airplanes will contact with TWR to take off.  
Then, they will be on LECM\_MIL\_CTR frequency where they stay during all the event.

## SCENERY

Specific scenery will be uploaded on the forum (Spanish and HQ) the day before of the event.  
And we recommend additional scenery, the scenery of AirHispania:
