Plan of Mission:

Hengam Island is an Iranian island located south of Qeshm Island, Iran, in the Persian Gulf.

The Iranian Navy Special Forces, known as "Takavaran," intend to conduct a military exercise on the coastline of Hengam Island, and this mission has been assigned to us. We are tasked with assisting them in this military exercise using helicopters and fighter aircraft.

In this real-world military exercise conducted in the same region, the operational skills of the Special Forces are evaluated, and they practice military operations on the coast.

In this event, we are divided into two teams: The **Green** Team is responsible for providing security and airspace coverage in the area, while the **Blue** Team is tasked with transporting the special forces and equipment to the island.

Please note that this event is **not a simulation of an attack**, this is simply an event on the IVAO network only.

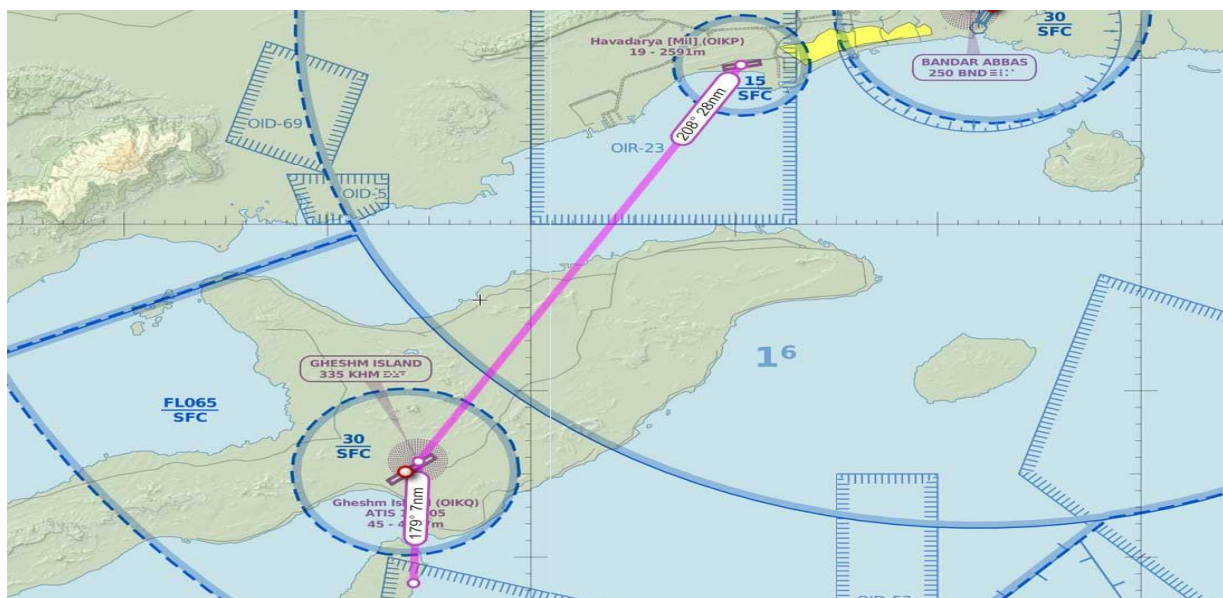

Rules and Regulations of the Blue Team

- The pilot must have Microsoft Flight Simulator X / 2020 or Lockheed Martin Prepar3D or X Plane.
- The pilot must be an active member of IVAO and register for participation in event on the Event Page.
- The only type allowed for this group is rotorcraft.
- It is mandatory to have "RMK/IRSOEVENT" In the flight plan remark section.
- User must complete all mission stages, otherwise will be removed from the participants list.
- Max Disconnection time is 5 minutes.
- Maximum altitude is 5500 feet above ground level.
- All pilots must maintain separation from GAT (General Air Traffic).
- In order to be able to complete the mission be aware of your equipments. We recommend flying in daylight time in your simulator.

Mission plan of the Blue Team:

- Departure from Havadarya Airport (OIKP).
- Continue fly to over Qeshm Island Airport (KHM NDB).
- Distance from Havadarya Airport is 28 NM, don't forget that you need to fly at an even altitude, like 2500 feet.
- After arriving over Qeshm Island Airport, you should fly towards heading 180 degrees. Hengam Island is located at a distance of 7 NM from KHM NDB.
- After arriving at Hengam Island, you must disembark the Special Forces on the eastern coast of the island. The choice of a safe landing site will be determined by the pilot and it must be within the eastern vicinity of the island.
- Be stationary on the ground for at least 2 minutes.
- Fly Back to Havadarya Airport. On the way back, don't forget that you need to fly at an odd altitude, like 3500 feet.

Rules and Regulations of the green Team

- The pilot must have Microsoft Flight Simulator X / 2020 or Lockheed Martin Prepar3D or X Plane.
- The pilot must be an active member of IVAO and register for participation in event on the Event Page.
- The only type allowed for this group is a Military fighter.
- It is mandatory to have "RMK/IRSOEVENT" In the flight plan remark section.
- User must complete all mission stages, otherwise will be removed from the participants list.
- Max Disconnection time is 5 minutes.
- Maximum altitude is 10500 feet above ground level.
- Minimum altitude is 6500 feet above ground level.
- All pilots must maintain separation from GAT (General Air Traffic).
- In order to be able to complete the mission be aware of your equipments. We recommend flying in daylight time in your simulator.

Mission plan of the Green Team:

- Departure from Bandar Abbas Airbase (OIKB).
- Continue fly to over Qeshm Island Airport (KHM NDB).
- After reaching the KHM NDB, you must establish a 15NM radius airspace coverage and remain in this area for one hour.
 - There is allowed for team members to return to base (OIKB) for refueling and continuing the mission.
- After completing the mission, you must return to the base and land there.

ATC Position:

Havadarya Airport Tower (OIKP_MIL_TWR):

- Control all operation takeoff and landing in the Havadarya Airport.
- Frequency is 123.150.
- Callsign: Havadarya Tower or Navy Tower.

Bandar Abbas Airbase (OIKB_MIL_GND):

- Control operations startup and taxi in the Bandar Abbas Air Base.
- Frequency: 121.950.
- Callsign: Bandar.

Tehran Radar (OIIX_MIL_CTR):

- Control all operation takeoff and landing in the Hengam Island and Control all operations after release by tower.
- Frequency: 133.100.
- Callsign: Tehran.

Qeshm Airport (OIKQ_TWR):

- This airport serves as an alternative and is only used in emergency situations.
- Frequency: 118.050.
- Callsign: Qeshm Tower.

Note: The Qeshm Airport scenery **may not be available** in FSX and Prepar3D simulators. You can download and install the scenery for this airport by [clicking here](#).
